

FRIDAY 4th OCTOBER 2019 IN LONDON

AI techniques are in use in many business applications. Their applicability stems from the flexibility they provide in modelling and solving real world problems. **Real AI 2019** will provide delegates with insights and case studies into using AI to solve business problems. The symposium is aimed at those using AI or who may be interested in understanding what AI can offer, and what it is doing right now. REAL AI will be held together with **MI Competition 2019**, which will provide live demonstrations of applications showing progress towards machine intelligence. Both Real AI and MI Competition is organised on behalf of BCS SGAI - the BCS Specialist Group on Artificial Intelligence.

BCS Southampton Street meeting rooms

Location
